## Quick Reference

If you see a **Platinum** marking next to a product it is a full synthetic oil; **Golden** is a synthetic blend oil and **Premium** is a petroleum based oil.

Anywhere you see the **Pure PAO Technology** logo, you can be assured that product is built from the ground up using 100% Group IV base stock oil.

This emblem is used to mark a product that is formulated specifically for **2-stroke** engines.

This mark is used to label a product that is formulated specifically for **4-stroke** engines.

In our automotive line, this shield signifies the presence of high levels of zinc and phosphorous, which translates to extreme protection.

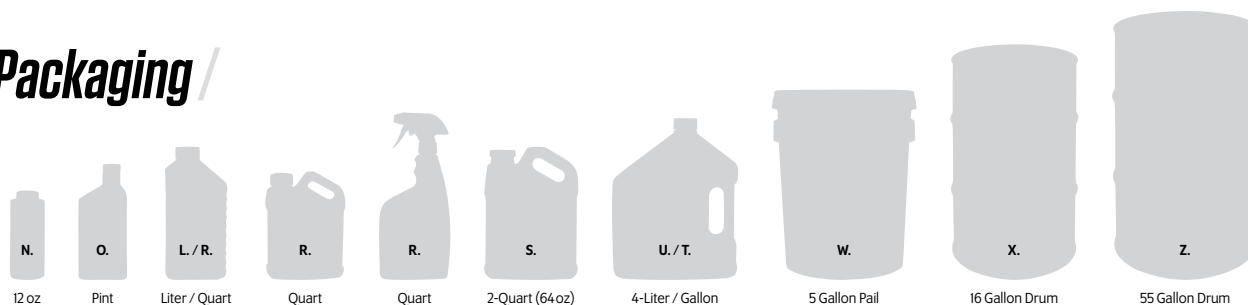

A product with this stamp is compatible with all off-road vehicles – from UTVs to dirt bikes.

## Packaging

Spectro® brand products are manufactured and marketed by Intercontinental Lubricants Corporation (ILC) of Brookfield, Connecticut, one of the world's foremost manufacturers and packagers of premium quality lubricants. ILC has been formulating, packaging and marketing premium lubricants since it was founded by Robert H. Wehman in 1966. The present company leaders, with over 200 years experience among them, all trained under "R.W." From the start, the company has insisted on exceptional product performance and absolute first class ingredients, and we continue to be relentless in this commitment to provide the best products for our customers.

Founder Bob Wehman, having solved fuel:oil mixture problems for Saab North America, turned his expertise to the rapidly growing 2-stroke motorcycle industry of the late 1960s. His formulations revolutionized the performance of these machines, and Spectro's Golden 2 Cycle helped many racers cross the finish line without problems, race after race.

Today's Spectro® products provide a full range of full-synthetic, synthetic blend and petroleum lubricants for all classes of power-sports engines and transmissions. Spectro® Platinum Full Synthetic oils are, without a doubt, among the finest synthetic lubricants you can run in a motorcycle. All Spectro® Platinum Synthetics are true synthetics, crafted on a batch-by-batch basis using Spectro's **Pure PAO Technology**. Built from the ground up out of molecules that have been constructed to provide superior strength and endurance, no matter how hard or how long you punish them.

The Spectro® line also includes superior suspension fluids, fork oils, brake fluids, coolant, chain lubes/waxes, filter cleaners and oils, and protection/appearance products.

In addition to the Spectro® line, ILC offers technical assistance, specialty blending and manufacturing services. ILC also provides customized products for motorcycle and automobile engine, transmission, and drivetrain builders and race teams.

Spectro® products are sold exclusively through certified motorcycle and power-sports retailers in the United States and in many international markets. Support of our retailers is the cornerstone of Spectro's® marketing and distribution system.

In many parts of the United States, and in other countries, retailers obtain their Spectro® products through a network of Spectro® Authorized Distributors. Contact information for these distributors can be found on our website at [www.spectro-oils.com](http://www.spectro-oils.com).

# WHY SPECTRO OILS?

**THE BEST OIL  
ON PLANET  
EARTH.**

**To The Consumer /** Spectro Oils of America hereby states that these products meet the specifications set forth in your vehicles manufacturer's warranty and their requirements for engine lubrication. Spectro will stand behind these products and your choice of these products and defend your right to choose. Remember, choosing an alternative to the OEM oil is not only allowed by the manufacturer, it is your right as a consumer.\* You must carefully follow the directions for engine break-in and maintenance as explained in your owner's manual. These oils are compatible with all other modern oils and will mix readily unless otherwise specified by the manufacturer.

**USE OF THESE PRODUCTS WILL NOT VOID YOUR WARRANTY**

\* Magnuson-Moss Warranty Improvement Act, Title 15  
Commerce and Trade, Chapter 50 Section 15

**PUREPAO**  
100% SYNTHETIC

## **Pure PAO Technology /**

Spectro's **Pure PAO Technology** logo refers to our 100% Pure Group IV Platinum Full Synthetic base stock oil. To learn more please go to page 6.

**12345**

## **Batch Blended /**

Spectro Oils is a company that stands by its quality and never compromises. Every batch has a unique 5 digit code on the back label to ensure the product was blended to meet every standard it was meant to meet with the exact components and ratios of each.

## **Made in the USA /**

Spectro Oils' headquarters is located in Brookfield, CT in the United States. From the base oils and additives to labels, caps and boxes, Spectro sources almost all of their materials for manufacturing from the United States.

## **The Oil Experts Since 1966 /**

**#TheOilExperts**

Spectro was founded in 1966 by Bob Wehman. Bob was integral in the beginning of Saab's development of their engine oils. He then decided to start his own business in the growing motorcycle and powersports industries. From day one, Spectro Oils has been a motorcycle and powersports oil manufacturer. Trust the experts in oil, choose Spectro Oils for all your motorcycle and powersports lubricant needs.

## **Our Ingredients Ensure /**

- **Smooth Shifting**
- **Superior Clutch Performance**  
formulated to provide smooth, controlled acceleration combined with positive hookup for efficient power transfer through all gears
- **Cleanliness** – maximum detergent additives
- **Corrosion Protection** – product designed to meet the rigorous requirements for marine use typical of NMMA-FCW approved lubricants
- **Shear Protection** – maximum gear and bearing protection under severe loads

## Choosing the Right Engine Oil

The following guidelines will help you select the motor oil that is most appropriate for your powersports or big-twin engine.

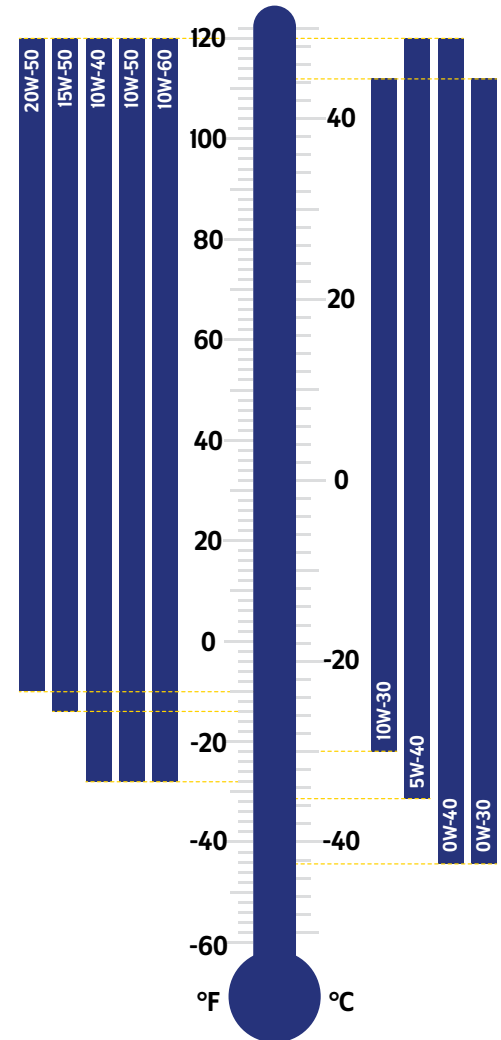

The first step in choosing a motor oil is to determine the appropriate SAE viscosity. The Society of American Engineers (SAE) has devised a classification system based on viscosity measurements. Viscosity measures the oil's ability to flow. When it's warm outside, an oil will flow more easily than when the outside temperature is cold - all oils thicken when the temperature drops. The proper viscosity grade ensures that the oil is sufficiently light enough to flow to critical engine areas and optimize fuel efficiency, yet sufficiently heavy enough to reduce friction and minimize metal to metal contact in critical areas.

There are two types of SAE classification: single grade and multi grade. A single grade oil such as SAE 30 has certain cold weather limitations. In very cold weather, it may not flow adequately to protect the engine.

A multi grade oil such as 10W-30 can be used across a broad range of temperatures. These oils are widely used because they allow for easy starting and pumping at low temperatures; yet they are viscous enough at high temperatures to lubricate effectively. The "W" stands for "winter" and indicates that the oil meets certain viscosity requirements for low temperature or operation.

Review your owners manual for the recommended grade for your vehicle. The following chart can help determine the SAE viscosity grade for your particular vehicle.

## Viscosity Recommendation in Relationship to Ambient Temperature

These guidelines are suitable for general use. Check your owner's manual for specific temperature recommendations for your engine.

## Why a Motorcycle Specific Oil?

The needs of a motorcycle engine are much different than that of a standard passenger car. Many motorcycles are designed to run at much higher RPMs and temperatures. The push for fuel economy in automotive engine applications has resulted in the use of more friction modifiers which help reduce friction in motors but can have adverse effects on a motorcycle's wet clutch system as it can cause the clutch plates to slip. Therefore, choose Spectro Performance Oils to guarantee you are using the best oil designed specifically for your motorcycle.

## JASO MA/MA2

Since 1998, the Japanese Automotive Standards Organization (JASO) has measured the quality of 4-stroke motorcycle engine oil.

Oils that are JASO MA/MA2 Certified resist clutch slippage, do not leave ashy deposits and meet JASO anti-corrosion and wear standards.

Spectro Oils products currently meet or exceed these very important standards for performance. Look for the JASO MA2 symbol on our bottles.

## PURE PAO 100% SYNTHETIC

### / What Is Pure PAO Technology? /

#### Group IV PAO (polyalphaolefin) /

Spectro's **Pure PAO Technology** logo refers to our 100% Pure Group IV Platinum Full Synthetic. It's crafted from modern Group IV PAO (polyalphaolefin) synthetic base stocks. These PAO molecules are assembled from the ground up to provide superior strength and endurance, no matter how hard or how long you punish them.

#### Engineered from Scratch /

The Group IV synthetic molecule is engineered from scratch to better resist being sheared in the gears and to fight degrading oxidation due to high temperatures. (The competitive Group III petroleum oils – adjudged “synthetic” in the course of a long, contentious legal proceeding have merely been refined to a higher level than standard petroleum. We would agree they are fine oils, but they are not purpose-built at the molecular level to deliver maximum endurance.)

#### Maximum Shear Stability /

The advantage of true, 100% synthetics isn't measured in lubrication qualities like “slipperiness”, but rather in longevity and “usability”. Easier starting at any temperature, less reaction to temperature extremes, greater durability and resistance to breakdown through molecular shearing are hallmarks of longevity and usability.

#### Longevity & Security /

Spectro Platinum delivers longevity and security, so when you're offered a “synthetic” at a lower price than Spectro Platinum, chances are, you're getting a inferior product.

# Platinum

## PURE PAO 100% SYNTHETIC

Look for the Platinum cap and  
Platinum logo on the label of  
4-stroke engine oils

## / What is Batch Blending? /

Spectro Oils of America has been blending state-of-the-art high performance lubricants for over 54 years. We are lubrication experts and we have always believed in formulating and crafting products that will outperform the competition and provide enhanced reliability in their intended applications.

This insistence on quality and performance has dictated rigorous methods, often at odds with many of the other brands in the market.

### ***We Batch-Blend to Better Control Quality and Consistency.***

For example, Spectro has always insisted on batch-blending all of its products. When our products are batch blended, the base stocks and additives that go into each and every bottle can be more carefully measured and controlled, ensuring performance consistency. If an additive is needed to counter a specific

problem, say power-robbing heat, Spectro ensures having the optimal dose of that additive in each and every bottle shipped to market. With batch-blending, we can do precisely that.

To ensure performance consistency, we clean the production lines between batches so there is no mixing of ingredients from one batch to the next. Most blenders are content with “mixed” product at the beginning and end of a run, which means you don’t always get the exact product the label says you’re getting.

With Spectro batch blending, both we and our customers can be confident the product is what it says on the label and will perform precisely as specified.

Batch blending is more costly, obviously. But in this age of expensive motorcycles, it is good to know that yours will be properly lubricated.

## Platinum

**PURE PAO**  
100% SYNTHETIC

### PLATINUM 4 FULL SYNTHETIC

This is the ultimate synthetic engine lubricant. Batch blended using Spectro's **Pure PAO Technology**, it dramatically increases throttle response and horsepower. Engines run cooler and transmissions benefit from smoother, quieter shifting. For street or track. Safe for wet clutch applications. Exceeds all known manufacturers' warranty requirements and recommendations, including A.P.I. SJ/JASO MA/MA2.

Official Oil of Cobra Motorcycles

## Golden

### SX2® 32:1 GOLDEN SYNTHETIC BLEND

This pre-mix, super-premium two-cycle engine lubricant is formulated specifically for use in modern two-cycle power valve engines. Mix at any OEM recommended fuel-to-oil mixture. Synthetic base stocks replace the high-density bright stock used in most lubricants, thereby reducing smoke and carbon residue. Provides exceptional ring groove and power valve cleanliness. Exceeds all known manufacturers' warranty requirements and recommendations, including JASO FC, ISO-L-EGD and API TC test requirements.

### SX4® PLATINUM FULL SYNTHETIC

The ultimate full synthetic motor lubricant for all four-stroke motocross and off road machines. Spectro's **Pure PAO Technology** makes SX4 extremely shear-stable and is designed specifically for use in high RPM racing conditions. Cams, rods, cylinders and pistons benefit tremendously from our increased ZDDP anti-wear additive treatments. Exceeds all known manufacturers' warranty requirements and recommendations, including A.P.I. SJ/JASO MA/MA2. For use in KTM®, Yamaha®, Honda®, Suzuki® and Kawasaki® four stroke racing engines.

## Golden

### GOLDEN SPECTRO TWO CYCLE PRE-MIX BLEND

This is the two-cycle engine lubricant that built our reputation and company. Probably the winningest oil out there. Because we significantly reduce excessive solvents (present in most two-cycle blends), running Golden Spectro® Two-Cycle Pre-Mix Blend at leaner ratios provides a higher level of detonation protection, stops plug fouling and smoking. Use according to motorcycle manufacturers' recommendations, or at 50:1; this product exceeds API TC test requirements. Not for use in oil injection systems.

*Cobra Motorcycles  
production 2-stroke  
motorcycle getting its filter  
oiled for the first time*

## **FILTER OIL**

This superior technology provides a significant step forward in filter function. Its “High Tac” synthetic formula traps and holds dust, even after hours of vibration exposure. With Spectro Air Filter Oil, dust can’t work its way through the filter the way it does with other aerosol products. Use with Filter Cleaner for complete filter maintenance. Fast, easy to use, won’t dry out and stays active. Ideal for all OEM and aftermarket air filters. Only to be used on foam and cloth type filters. Super tacky “High Tac” technology traps and holds dust.

**10 OZ. NET WEIGHT CAN (12/CASE)**

H.FILTER

## **FILTER CLEANER**

The ultimate time saver and an invaluable piece of maintenance equipment, Spectro Filter Cleaner is an emulsifying agent that picks up and slicks away water soluble grease and oil, and leaves the filter squeaky clean. Use in all off-road competition motorcycle air filters, except paper types. For best results, use in combination with Spectro Filter Oil. No fumes, no flame hazards, works its wonders in a bucket of warm water.

**12 OZ. NET WEIGHT CAN (12/CASE)**
